

Demonstration Title

Time Taken (if necessary)

Objectives: (optional)

The students will:

- What do you want the student to gain from this demonstration.

Materials:

- What will be needed (whether it be from the demonstration side or something that is brought by you).

Vocabulary: (optional)

- Will the student be able to link common physics vocabulary to this demonstration? If so, what?

Procedures:

- Do have a specific method or procedure that makes this demonstration run smoothly or tie into the lecture very well?

End of activity questions to ask: (optional)

- Something that will make the students connect this to the lecture.
